

Dear Hiring Manager,

I am writing to express my interest in the internship opportunity at your organization. I am currently pursuing a Bachelor's degree in Computer Engineering at Cosmos College of Management and Technology, maintaining an excellent academic record with a 3.90 GPA up to my sixth semester. I have consistently ranked as the university topper in three semesters and the college topper in all semesters, reflecting my strong commitment to academic excellence.

My primary area of interest lies in Artificial Intelligence and Machine Learning. I have gained hands-on experience working with Python, both as a developer and as a trainer at my college, where I have helped others build foundational programming skills. Additionally, I have developed a face recognition system using computer vision techniques, implementing models with libraries such as dlib and Haar Cascade, along with other machine learning algorithms.

I also completed a two-month internship at Deepqore, where I was exposed to practical industry workflows and further strengthened my technical and problem-solving abilities. This experience enhanced my understanding of real-world applications of AI/ML concepts and collaborative development environments.

Regarding my availability, I have completed my seventh semester board exams. As part of my eighth semester curriculum, I am required to undertake a full-time internship, making me fully available to commit to this opportunity. I believe this position aligns perfectly with both my academic requirements and my career aspirations.

I am eager to contribute, learn, and grow within your organization. I am confident that my strong academic background, practical experience, and passion for AI/ML will allow me to add value to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your organization.
