To,

Hiring Team

Guardsix

Kathmandu, Bagmati Pradesh

Subject: Application for Associate Solutions Engineer Position

Dear Hiring Team,

I am writing to formally apply for the position of Associate Solutions Engineer at guardsix. I am currently a final year student pursuing a Bachelor's degree in Computer Engineering at Cosmos College of Management and Technology. At present, I am appearing in my seventh semester examinations, which will conclude on April 3, 2025. As part of my academic requirements, I am expected to undertake an internship in the upcoming semester, and I believe this position would be an excellent opportunity to gain relevant industry experience.

During my academic journey, I have consistently achieved strong results and have developed a solid foundation in core subjects such as Operating Systems, Computer Networks, and Network and Cybersecurity. My interest in networking and cybersecurity has been greatly influenced by my mentor, Kushal Dhakal, whose guidance encouraged me to explore these fields in depth.

In addition to my academic background, I have gained practical experience as an AI and Machine Learning Research Intern at DeepQore Pvt. Ltd., where I worked on real world applications and developed an understanding of secure system design and data handling practices. I have also been involved in projects such as VedaSync and Maternify, which allowed me to apply my knowledge in machine learning, system design, and data driven solutions.

Furthermore, I possess intermediate proficiency in Python and have studied subjects including Artificial Intelligence, Machine Learning, Data Science and Analytics, and Generative AI. I also have a good understanding of Linux based systems and networking fundamentals, which I believe align well with the requirements of this role.

I am particularly interested in this role as it offers the opportunity to work in cybersecurity while engaging with customers and solving practical technical challenges. I am eager to contribute to your team and further develop my skills in a professional environment.

Thank you for your time and consideration. I would welcome the opportunity to discuss my application further.

Yours sincerely,

Ichhit Sapkota
